

## Creation of IBM CLOUD SERVICES

Team ID	PNT2022TMID15872
Project Name	Smart Waste Management System for Metropolitan Cities

### SCREENSHOT OF CLOUD ACCOUNT CREATION:

The screenshot displays the IBM Cloud Service Details page for the 'Internet of Things Platform-k2'. The page is titled 'Service Details - IBM Cloud' in the browser tab. The URL in the address bar is 'cloud.ibm.com/services/iotf-service/crn%3Av1%3Abluemix%3Apublic%3Aiotf-service%3Aeu-gb%3Aa%2Fae4950b1264e4ba99c1b97083772924d%3A0e...'. The page header shows the IBM Cloud logo, a search bar, and navigation links for 'Catalog', 'Manage', and 'NARMADHA B's Account'. The main content area features a large illustration of a central device connected to various sensors and data points. Below this, the text 'Let's get started with IBM Watson IoT Platform' is displayed, followed by a description: 'Securely connect, control, and manage devices. Quickly build IoT applications that analyze data from the physical world.' Two buttons, 'Launch' and 'Docs', are provided. A section titled 'Ready for the next level?' introduces the 'IBM Watson IoT Platform Journey'. This journey is divided into three stages: 'Lite', 'Non-Production', and 'Production'. The 'Lite' stage is marked as completed with a checkmark. The 'Non-Production' and 'Production' stages are marked with circles. Each stage has a brief description and a list of features or pricing details.

**Ready for the next level?**

**IBM Watson IoT Platform Journey**

**Lite**

The Lite service plan provides a lightweight development environment to get you started with the connectivity capabilities of Watson IoT Platform.

- Free
- 200 MB data-transfer limit
- 500 application bindings limit
- 500 registered devices limit

**Non-Production**

The Non-Production service plan is a full-featured, fully-integrated offering that enables you to explore Watson IoT Platform to see how the service can fit into your IoT environment.

- Starts at \$500 per month
- Capacity limit based on device type
- Optional Analytics Service and Blockchain Service add-ons

**Production**

The Production service is a fully managed SaaS offering that enables you to manage and analyze enterprise IoT data.

- Includes IBM Service & Support
- Pricing based on number of devices per device type
- Optional Analytics Service and Blockchain Service add-ons
